COMP3512 Chapter 17 Instructions

This lab will provide you with some experience creating a data layer in PHP.

- Using a web browser, visit https://github.com/rconnolly/comp3512-f2017-chapter17.

- In a new browser tab, start Cloud9 and login.

- Create a new **public** workspace named **comp3512-php-5**. In the Clone from Git field, enter **https://github.com/rconnolly/comp3512-f2017-chapter17.git** and select the **PHP** template. Click the Create Workspace button.

- Once the workspace is loaded, you will find a step-by-step lab (see lab17.pdf). You will need to install the database:

```
mysql-ctl start
mysql-ctl cli
source book-complete.sql
```

- There is no lab homework for next week but finishing this lab will help with your second assignment.
